Profile

Senior software engineer with 16 years building enterprise applications for investment management, including over six years on sovereign wealth fund systems. Works closely with business teams to deliver high-performance, scalable portfolio management and front-office research platforms. Hands-on in C#/.NET, ASP.NET Core, WPF, React/TypeScript and Azure, with Docker, Kubernetes and Terraform, plus AI tooling such as Azure AI Foundry, Claude Code and GitHub Copilot. Strong in solution design, distributed systems, RESTful APIs, DDD and SOLID, taking work from design through testing, release and production support.

Core expertise

ARCHITECTURE & DESIGN	ENGINEERING LEADERSHIP	FINANCIAL TECHNOLOGY
Solution & system design	Technical leadership & mentoring	Investment management
Distributed systems, microservices	Code reviews & quality standards	Fixed-income trading
DDD, SOLID, design patterns	Agile, Scrum, SAFe, TDD	Front-office research platforms
RESTful APIs, performance tuning	Testing & production support	Transaction management systems

Professional experience

Abu Dhabi Investment Authority (ADIA)

Abu Dhabi, UAE

Senior Specialist

Mar 2026 – Present

Specialist

Jul 2022 – Mar 2026

- Partner with business teams to build and maintain high-performance, scalable portfolio management applications.
- Design and build RESTful APIs and services in C# (.NET Core, ASP.NET Core) with React/TypeScript front ends, applying SOLID, DDD and design patterns on Azure, Docker, Kubernetes and Terraform.
- Integrate in-house applications with third-party market data and trading platforms through vendor APIs.
- Build AI tools with Azure AI Foundry and MCP for portfolio analysis, order cloning and order approval.
- Mentor 5+ engineers and lead peer code reviews, setting coding and design standards for the team.
- Run system integration testing and UAT with business users, and write documentation and user guides.

Luxoft

Mar 2020 – Jun 2022

Senior Software Engineer · client: ADIA

Abu Dhabi, UAE

- Led development of a front-office research platform used by 50+ investment professionals, built on React, TypeScript, ASP.NET MVC, MongoDB, OpenFin and Azure.
- Shaped the architecture so the platform could be consumed from .NET, JavaScript and Python.
- Delivered features for a fixed-income trading and risk platform in C#, WPF and .NET on Azure.
- Reviewed the team's code and drove ongoing enhancements to the platform.

JPMorgan Chase & Co.

Jul 2019 – Mar 2020

Associate

Bengaluru, India

- Built components for a robo-advisory investment platform in React, TypeScript and Java.
- Worked directly with business stakeholders to deliver customer-facing investment features.

Publicis Sapient

Jul 2017 – Jul 2019

Senior Technical Associate

Bengaluru, India

- Built a hybrid hedge-fund transaction management system using React, WPF, OpenFin and Node.js.
- Built advanced filtering and bulk transaction amendment for operations users.
- Set up the build and deployment pipeline on Bamboo, Bitbucket and JIRA.
- Owned and migrated a legacy MFC (C++) transaction management application with no business disruption.

Intuit

Jun 2016 – Jul 2017

Senior Software Engineer

Bengaluru, India

- Built features for TurboTax, the DIY tax preparation and e-filing product, in WPF and React.
- Contributed across the full lifecycle: design, architecture, development, testing and documentation.
- Served as Scrum Master and worked directly with end users, acting on their feedback to improve the product.

Earlier career**UST Global · System Analyst, Philips Healthcare**

Sep 2014 – May 2016

Built a WPF/SQLite log analyzer for Philips Healthcare devices and an Angular knowledge base of known log patterns to speed up issue resolution; worked in SAFe with pair programming.

Aditi Technologies · Senior Development Engineer

Jul 2013 – Sep 2014

Built a project-management dashboard (WPF, WCF, SQL Server) and a tools-maintenance application for Microsoft (Knockout JS, HTML5), hosted on Microsoft Azure; worked with clients on functional requirements.

Syncfusion · Software Engineer

Jul 2010 – Jul 2013

Developed a .NET WPF UI component library used across many applications; benchmarked competitor products, took part in peer reviews and supported customers using the controls.

Technical skills

Languages	C#, TypeScript, JavaScript, Python
Frameworks	.NET Core, ASP.NET Core, React, WPF, Angular, Knockout JS, OpenFin (Here), HTML5
Cloud & DevOps	Azure, Azure DevOps, Docker, Kubernetes, Terraform, CI/CD, Bamboo, Bitbucket, JIRA
Data	SQL Server, MongoDB, Databricks, SQLite
AI	Azure AI Foundry, MCP, Claude Code, GitHub Copilot
Tools	Visual Studio, VS Code, Cursor, SSMS, Postman, JetBrains, DevExpress
Practices	Agile, Scrum, SAFe, TDD, DDD, SOLID, design patterns, code reviews, performance optimisation, modernisation

Education**Master of Computer Applications (MCA)**

2007 – 2010

Anna University, Chennai

B.Sc., Computer Science

2004 – 2007

Bharathiar University, Coimbatore

Certification

Microsoft Azure
